

Formula Student Norddeutschland

11.-14. June 2020

Schwedt/Oder

0 Purpose of this document

As the rules are mainly written for active Teams this handbook is providing additional information for alumni teams.

This document should give you an overview about the differences between Official and Alumni competition.

1. Differences

In the following section you find the main differences between the competition for an Official Team and for an Alumni Team.

1.1. Registration Fee

In general, all rules for registration including estimated number of participants and payment deadlines apply also for alumni teams. With one exception: There is no initial registration fee that needs to be paid.

1.2. Scrutineering

The scrutineering will only check safety critical parts of your car. Things like university name, car number, etc. will not be checked.

1.3. Static Events

You do not have to prepare and present any static events. In case that you are interested in the judging sessions on Thursday and Friday there may be the possibility to integrate you in a judging group spontaneously.

1.4. Dynamic Events

All Dynamic Events will be held on the same tracks and at the same times as for the active teams.

1.5. Dynamics Track Test

You will have the opportunity to test the AutoX/Endurance Track for on lap on Saturday morning and give feedback about the track layout
