

Packing List VDE E-Race

Pit und Team Tents

The pit lane and social area will be set up separately on the campsite. There is no fixed pit building, so you will need to bring and set up your own pit structure. Since we have a particularly large number of teams and team members this year, we would appreciate it if smaller teams that do not need two large tents could team up with each other or accommodate their alumni. Feel free to use the WhatsApp group to coordinate.

Tables and Benches

Our large tent will primarily be used for two larger gatherings — the Team Welcome and the Award Ceremony — at the beginning and end of the event. We have only ordered a few extra beer garden sets for these occasions, so the "bring your own bench" principle applies here, as in previous years.

Cones

As a pre-event, we have not purchased our own cones and will therefore rely on yours to set up the dynamic events. Simply pack what you normally use for testing. If you plan to run driverless disciplines, please make sure to bring the correctly coloured cones.

Brooms

The track needs to be swept before the first cars go out to ensure proper surface conditions. Before we go Vroom we need to Broom. To make this quick and efficient, we need team members and brooms. You are already bringing the team members — just make sure to throw a few brooms in the trailer too.

CEE Adapter

Required to access power on the campsite via Schuko connectors.

Floor Coverings for Pit Boxes

Please bring suitable materials — such as tarpaulins, rubber mats, or similar coverings — to cover the floor of your pit box. This helps protect the campsite ground and keeps our hosts happy.

Measuring Equipment for Electrical Inspection

Please bring a multimeter and insulation tester for the electrical technical inspection, as we do not have all equipment available on-site.
